# Proven Concepts – Applied

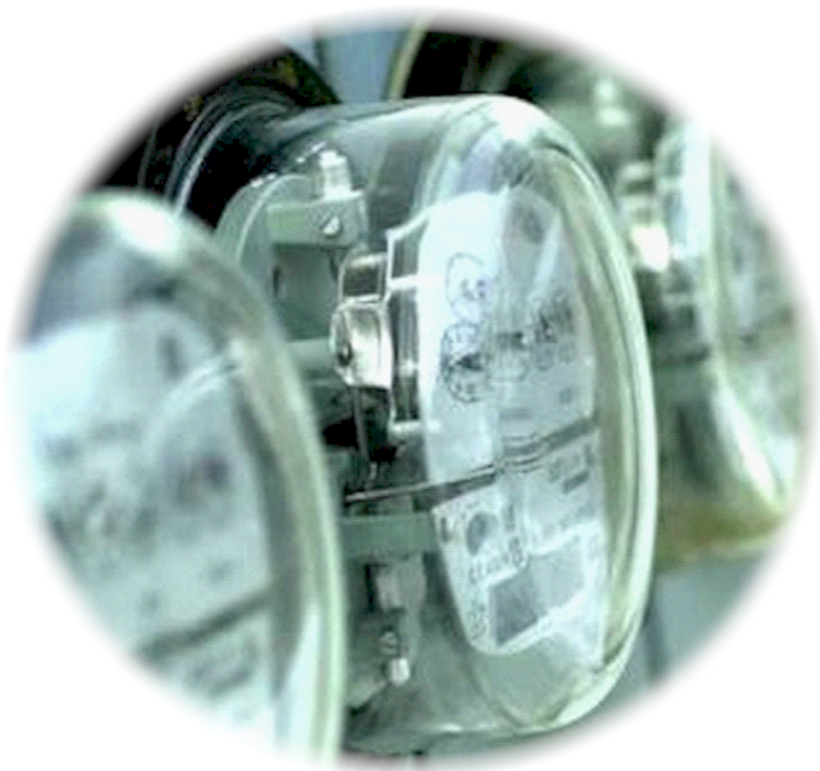

Several concepts are available and many seem to make sense when you first look at them.

You invest valuable time and precious resources evaluating what might work and soon find out that you have run out of time and resources.

## ***Straight Talk About What Works***

*Applied Concepts & Technologies Corp. specializes in performing the due diligence to determine when something is "Real" and what just sounds good.*

*Our Professional Application Integrators understand the business of your organization and make sure that what is recommended applies to you, your business and most of all, your needs.*

## **CONCEPTS THAT WORK for YOU**

### ***Operating costs impact every aspect of your business.***

The key contributor to operating costs is your electric bill. Each month your cost for electricity becomes a burden on your ability to maintain or achieve needed profitability.

### ***Proven Concept***

Reducing your electric bill puts real money on your bottom line.

### ***Applied...***

Real energy savings from your existing systems are available to you right now. Applying them and maximizing the benefit to you achieves big results fast.

### ***Result***

Fast paybacks from your investments put savings (Profits) directly to your bottom line.

# Proven Technologies – Applied

## **More Straight Talk About What Works**

*Applied Concepts & Technologies Corp. specializes in understanding what technologies make sense for you today and which ones will be better with more development.*

*Our Professional Application Integrators work to understand your organization and customize specific technologies that apply to you, your business and most of all, your needs.*

All new technology sounds great. The trouble is, who can afford to sort through all of it and know they are making the right decision.

Understanding how to properly apply this technology to the real world is a challenge that is consistently met.

## **TECHNOLOGY APPLIED for YOU**

### **Green Building & LEED Everyone Has Something.**

If you did everything that you could do you would go broke. Sure it all sounds good and each technology has its place in a facility. Which ones you use depends on the payback you will get.

### **Proven Technologies (Example)**

UVC Lights have shown that real money goes directly to your bottom line.

### **Applied...**

Low cost retrofits for your existing systems are available to you right now. Optimize your current operations with customized applications.

### **Result**

Fast paybacks from your investments put savings (Profits) directly to your bottom line.
